BRIEFING
Next Generation EU (NGEU) delivery

Gender equality in the Recovery and Resilience Facility

SUMMARY
The negative impact of the COVID-19 crisis on women's social and economic situation triggered a debate on the urgent need for a gender-sensitive policy response to the pandemic. In this context, the establishment of the Recovery and Resilience Facility (RRF) – the EU's biggest financial instrument supporting recovery in the Member States – is an opportunity to channel extraordinary resources toward measures that take into account the principles of gender equality. It is also a chance to put into practice the EU's long-standing commitments to mainstream gender across different policies and apply gender budgeting principles to EU spending.

Offering an overview of how gender equality has been built into the RRF Regulation, this briefing explains what was expected from the Member States when they were preparing their national recovery and resilience plans (NRRPs) as regards gender equality. It also provides practical examples of reforms and investments where gender equality has been taken into account, from the 26 NRRPs approved by mid-October 2022 (only Hungary's plan is awaiting the Commission's assessment).

In keeping with the RRF Regulation, all the NRRPs analysed declare gender equality to be a horizontal objective, to be given consideration in all measures. However, only some Member States have included dedicated reforms or investments addressing gender-related challenges explicitly or indicating women as the main beneficiaries. The most numerous and innovative measures, with gender equality clearly indicated in the milestones or targets linked to them, are present in the plans of Belgium, Estonia, Spain, Italy and Austria.

This is a further update of a briefing the previous edition of which was published in April 2022.

BRIEFING
Next Generation EU (NGEU) delivery – How are the Member States doing?

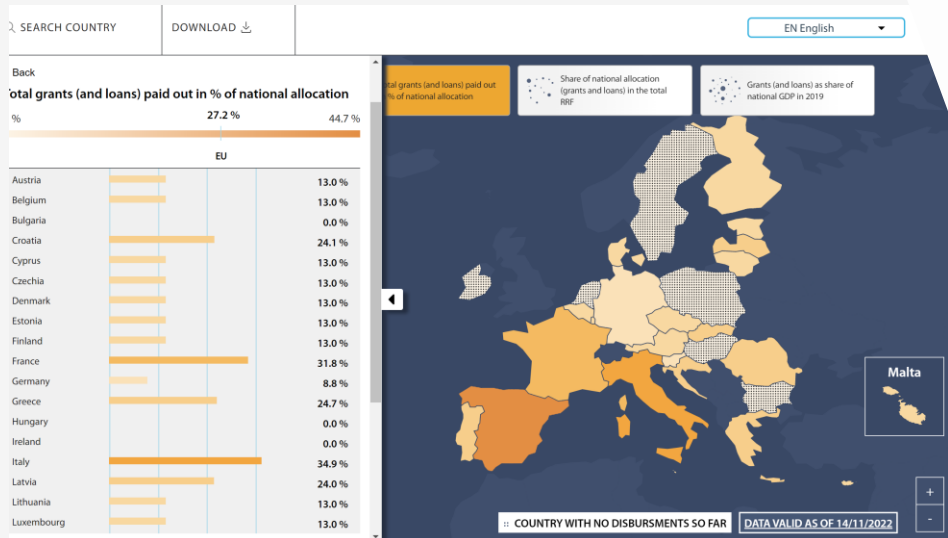

Poland's National Recovery and Resilience Plan latest state of play

ALL RESOURCES
Resilience Facility (RRF): €35.36 billion

RRF loans: 33 %
Share of national GDP: 6.6 %

In nominal terms, Poland is the fourth biggest beneficiary of the Recovery and Resilience Facility (RRF), after Italy, Spain and France¹. EU support for implementing Poland's National Recovery and Resilience Plan (NRRP) – and includes €23.85 billion in grants and €11.51 billion in loans (a third of the maximum amount of loans available)². The total allocation (grants and loans) has to be paid out to Poland by the end of 2026; this amount represents almost 5 % of the total RRF and stood at 6.6 % of the country's gross domestic product (GDP) in 2019 (the RRF being 5.2 % of EU-27 GDP in 2019)³. RRF support per capita for Poland totals €935. Following the revision of the NRRP was reduced to €22.53 billion (-5.6 %). Owing to the plan's grants and nine for loans – will depend on progress in the first instalment can be made only if the commitments are fulfilled. Poland's NRRP includes 50 reforms and the Covid-19 pandemic's socioeconomic consequences spending on these areas exceeds the compulsory 1.3 % for digital. Other priority areas include well-functioning public institutions and the judiciary.

Timeline:
3/5/21 Plan submitted to the Commission
14/6/22 Council approval
30/6/22 First deadline for achievements
30/6/26 Final deadline for achievements

IN THIS BRIEFING

- Gender equality and the EU recovery instrument
- Gender equality in the RRF Regulation
- Examples of NRRP measures addressing gender equality
- Stakeholders' views
- The role of the European Parliament
- Annex – European Commission assessments and examples of measures addressing gender equality (GE) in the NRRPs
